

## Press Release

---

### **BioHorizons Camlog addresses new approaches on immediacy and soft tissue management at the International Osteology Symposium 2023.**

**BioHorizons Camlog offers an informative Corporate Forum on immediate treatment with CONELOG® Progressive-Line and a workshop session focused on soft tissue management featuring NovoMatrix, the next generation soft tissue augmentation material.**

**Basel – 23 March 2023.** The International Osteology Symposium 2023 will be held from 27 to 29 April 2023, in Barcelona, Spain, and will bring together leading experts in all fields of regeneration offering an exciting programme including a total of 80 presentations and 14 workshops under the Scientific direction of Drs. Pamela K. McClain and Istvan Urban. BioHorizons Camlog is a Gold Partner and offers two educational programmes to the attendees.

On Thursday, 27 April 2023, Dr. Ramón Gómez Meda (Spain), gives insights into a new approach to soft-tissue augmentation around implants using the NovoMatrix™ dermal matrix. He will dive deep into indications, techniques, and clinical cases highlighting soft-tissue augmentation to achieve predictable results with NovoMatrix; participants can benefit from a hands-on training on pig jaws to learn VISTA, tunnel and crestal incision techniques for soft-tissue augmentation.

Later the same day, Dr. Tomas Linkevicius (Lithuania) will lead a Corporate Forum, offering a differentiating approach to immediate implant concepts entitled “Turning contraindication for immediacy into indication”. In his presentation, attendees will have the chance to discuss why immediate implant treatment is often an optimum solution and how to expand the indications for immediacy.

Attendees are invited to visit the BioHorizons Camlog booth 3 and discover the Company’s broad portfolio of innovative and holistic regenerative solutions through its comprehensive line of biomaterials, including bone replacement grafts (allogeneic, porcine, bovine, and synthetic), membranes (porcine, bovine, and synthetic), reconstructive tissue matrices (porcine) and wound dressings (bovine). BioHorizons Camlog has established one of the leading implant companies with a comprehensive portfolio of biomaterials solutions that allows dental professionals to give their patients the best possible treatment.
